

I find the traffic and weather channels on XM a great help to my commute every day, I drive an average of 100 miles a day and depend on the instant traffic to help me avoid the trouble spots in my area. Not only that but I feel that since I pay for XM service it should be up to me to say what services I want and don't want. I gladly pay for a service that suits my needs and I don't feel the National Association of Broadcasters should have thier way with thier petition 04-160. Not only is it a great tool in my commute but now when there is an amber alert I have all the info in my vehicle insted of me driving by a traffic alert sign and trying to quickly read it and hope I get all the info while I am trying to drive down the road. Thank you very much for taking the time to read this,
Daniel Roskowski
